

When they ask if you comply with the HIPAA Security Rule, how will you answer?

Introducing the HIPAA Compliance Solution powered by Policy Commander™—the easy, automated way to HIPAA security compliance.

Making sure your IT infrastructure complies with the HIPAA Security Rule is no easy task. But the HIPAA Compliance Solution from New Boundary Technologies cuts through HIPAA Security Rule complexity, translating its requirements into specific computer security policies that make compliance easy.

Keys to Compliance

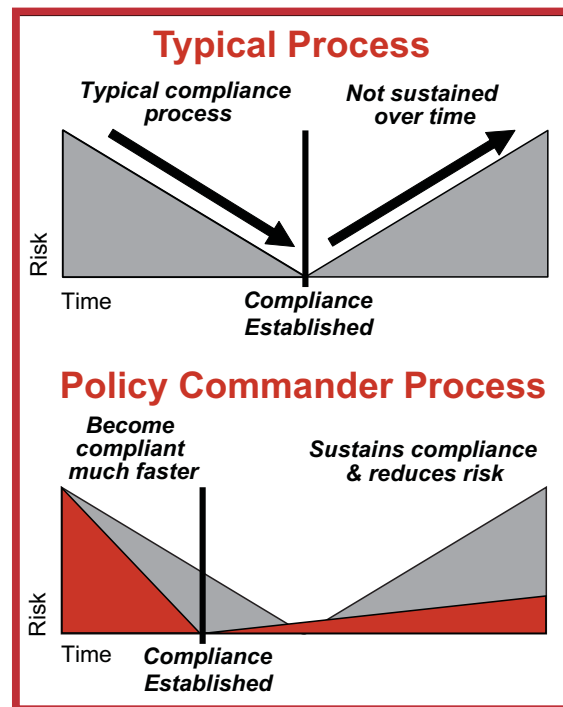

To comply with the HIPAA Security rule, you need to lock down computers with access to electronic protected health information (EPHI) – and secure the information on them – continuously and automatically. Policy Commander does just that by easily establishing and automatically maintaining secure computer configurations that comply with the HIPAA Security Rule.

Content and Control

Our solution starts with the *HIPAA Security Guide* that leads you easily through the steps to HIPAA Security Rule compliance. Next, we deliver a comprehensive HIPAA Security Policy Library of proven

computer security policies, including recommendations from the National Institute of Standards and Technology (NIST). Our HIPAA security policies are simple but powerful, giving you granular control over creating the specific security level you want for each computer. Finally, with a single mouse click, Policy Commander enforces the right policies for each computer – automatically. Policy Commander even helps you create or customize security policies with an integrated Policy Editor.

The New Boundary Technologies HIPAA Compliance Solution helps you quickly secure computers and EPHI to reduce security risk. You spend much less time becoming compliant, and Policy Commander keeps you compliant over time.

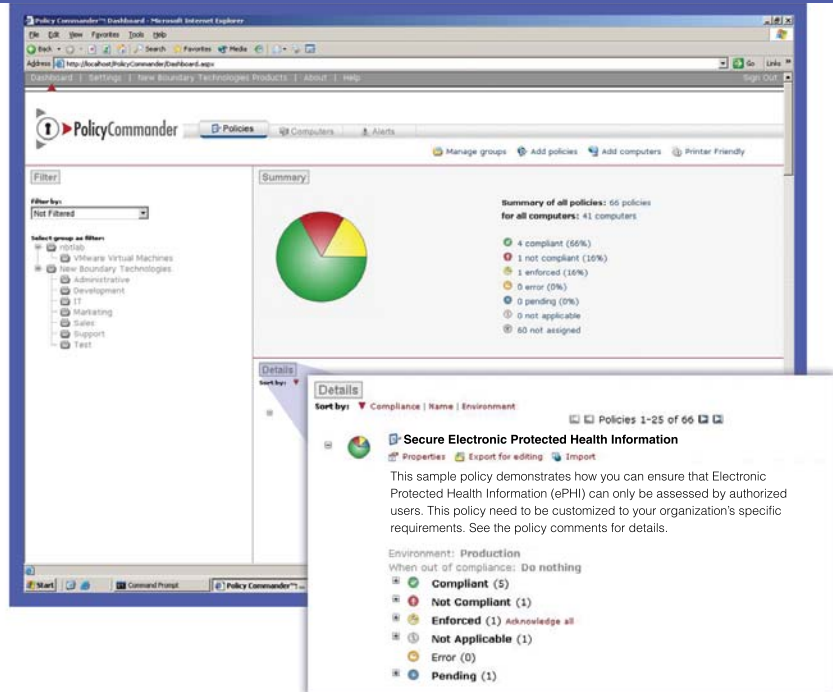

Key Benefits:

- **Ensure** compliance with HIPAA Security Rule requirements.
- **Continuously** secure EPHI.
- **Demonstrate** continuous HIPAA Security Rule enforcement to auditors.
- **Easily** establish and maintain secure computer configurations.
- **Eliminate** up to 90% of computer vulnerabilities.

Innovative Features:

- **HIPAA Security Guide** translates Security Rule into specific policies.
- **Comprehensive HIPAA Security Policy Library** based on NIST-recommended standards.
- **Automated**, real-time monitoring and alerts.
- **Enforce security policies** on remote and disconnected computers.
- **Innovative policy format** targets the right policies to each computer.
- **Integrated Policy Editor** to create or customize policies.

Ensure that your computers comply with critical HIPAA security guidelines — automatically.

Policy Commander delivers 24/7 enforcement of HIPAA security policies.

Our HIPAA Compliance Solution gives healthcare IT professionals a proactive solution for managing Security Rule compliance. It provides security officers and executives with a real-time view of compliance status. It shows auditors that you have real-time, continuous enforcement of your HIPAA security settings and configurations. And Policy Commander is unique in its ability to continuously secure data, workstations, and servers —so your EPHI is always protected against unauthorized access.

Comply with the HIPAA Security Rule while establishing security best practices throughout your organization. Learn more about our HIPAA Compliance Solution powered by Policy Commander at www.policycommander.com, or call 1-800-747-4487 for more information.
