FEATURES:

Remote Temperature and Humidity Monitoring: Quickly detect product temperature and humidity problems to minimize loss and damage.

Real-time Visibility: Monitor your equipment and products on site and in transit.

Cloud-based Data Logging: Eliminate manual temperature logging.

Real-time Text and Email Alerts: Receive immediate alerts when user-defined thresholds are exceeded.

Built-in Map Views: See the location of all your assets at a glance.

Built-in Reports: See the status and history of your assets. Add custom reports for your business.

Robust and Field Proven: We've been providing temperature monitoring solutions for over 20 years.

Single-pane-of-glass Dashboard: Add sensors from multiple assets and live video in a single dashboard.

Easy to Customize: Create personalized dashboards without programmers or web developers.

User-friendly Interface: TempVista™ is very easy and intuitive to use with a common interface on phone, tablet, laptop and PC.

Easy to Scale and Deploy: Scale to monitor thousands of assets.

Data Security: Cellular private networks, roles-based user security, and state-of-the-art secure hosting ensure your data is secure.

Hardware and Communication Independent:

Support for Ethernet, Wi-Fi, LoRa, Cellular, LPWAN and Satellite connections to the Internet.

Easy API Integration: Integrate TempVista™ data with back-office and analytics applications.

Private Label Branding Available: TempVista™ can be branded for your company.

TempVista gives you end-to-end temperature visibility, improves your supply chain and eliminates product loss
